10 Questions and answers

No money moves through the app.
You pay the organizer directly (UPI, cash, whatever your group uses), and the organizer pays winnings back the same way. Dugout XI records who paid, who picked what, who won, and who is owed what.

Getting started

An account takes a minute. Invite links bring you straight back to the league or contest.

Create your account

From the app link, or an invite a friend sent you.

1. Open the link and tap **Create one** (from an invite, the form opens on its own).
2. Enter your **name**, a **display name** (what friends see on the table), your **email** and a **password** of 8+ characters.
3. Tap **Create account**. You are signed in at once.

Forgot your password?

There is no email from the app, so the admins help.

1. On sign-in tap **Forgot password?**, enter your email, tap **Ask for a reset**.
2. An admin sends you a **temporary password** (usually on WhatsApp).
3. Sign in with it; the app asks you to **choose your own** first.

Getting around

On a phone these are the tabs along the bottom of the screen.

WHERE	WHAT IT IS FOR
Home	Your record at a glance, money coming back to you, and anything waiting on you: a pick to make, a payment due.
Leagues	Your leagues, **Start a league**, and opening one with an invite code.
Contests	Your one-off contests, **Create a contest**, and opening one by its number.
Alerts	Join decisions, payment and pick reminders, results, settle-up. A red badge counts the unread ones.
Your name (top right)	Your profile: record, details, password, Excel copy, sign out.
Moon / sun (top right)	Switch between **Day** and **Dark**. Your choice is remembered; until then the app follows your phone.

Changing your password

Profile → **Change password**. Every other phone or computer you were signed in on is signed out.

The first visit can be slow

After a quiet spell the server takes up to a minute to wake. If you see "Could not reach the server", wait a moment and refresh.

How a league works

A season-long competition among friends, for a tournament such as IPL 2026.

The deal

Set by the organizer when the league is created.

PER MATCH	MATCHES	BUY-IN	AT THE END
₹100	**20**	**₹2,000**	**Balance**
entry for each match	in the season	paid up front	handed back to you

- **You are in every match automatically** once your place is confirmed. You only make your pick.
- **Each match is a small pot.** Everyone's ₹100 goes in; those who picked the winner share it.
- **The table** ranks everyone by net profit: what you've won minus what your entries cost so far.
- **At the end** the organizer hands you back your final balance = buy-in + net profit. Nobody pays more than the buy-in.

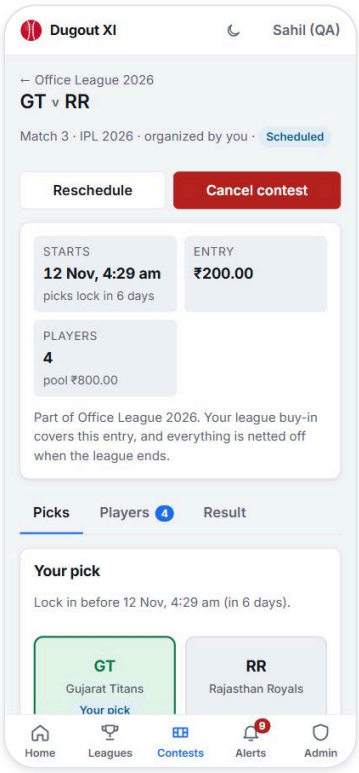

Example

You win ₹2,600 over the season and your entries cost ₹2,000: net profit +₹600, so you get back **₹2,600**. Someone at −₹500 gets back ₹1,500.

Joining and playing

1. **Open the invite**: the link, or Leagues → enter the **invite code**. You see the price and deadlines.
2. Tap **Ask to join** before "Joining closes". The organizer is told.
3. **Pay the buy-in** as the league's "How to pay" says, before **Payment due**. Unpaid places are released automatically.
4. The organizer marks **Payment received**; you get an alert and you're **Confirmed**.
5. **Pick**: open a match (league → **Contests**) and tap the team you think will win. Change it any time until the start; then picks lock.
6. Follow the **Table**, and **Share on WhatsApp** to your group.

Good to know: other players' picks stay hidden until the match starts. No pick still counts as an entry, and can't win. Nobody joins once the first match has started.

Your pick shows in green.

One-off contests

A single match with its own entry fee, outside any league. It settles as soon as the result is in.

1. **Open it** from the link a friend shared, or Contests → enter its **number** (for example #9) → Open contest.
2. Tap Ask to join before "Joining closes". You can Withdraw my request while it waits.
3. Once accepted, **pay the entry** before "Payment due", or your place is released.
4. **Pick the winner** before the match starts.
5. After the result, the Money tab shows who is owed what. The organizer pays out and marks each one Paid out.

A contest with fewer than 2 confirmed players at its start is cancelled, and anyone who paid is refunded.

Results, winnings and refunds

The same rules for every match, in leagues and one-off contests alike.

THE POT	WINNERS	EACH WINNER
₹600	2	₹300
6 players × ₹100	picked the winning team	profit +₹200; the other 4 lose ₹100

RULE	WHAT IT MEANS
Winners share equally	Everyone who picked the winning team gets an equal share of the pot.
Odd paise	If a pot doesn't divide exactly, the few paise left are recorded, not handed to anyone at random.
Everyone refunded	When the match has **no result**, **nobody** picked the winner, or **everybody** did. Nothing is won or lost.
No pick	Your entry is in the pot, and you can't win that match.

Corrections

If an organizer entered a wrong result, they can correct it (with a written reason, kept on record) until money has been paid out. Figures update everywhere.

Share it

Results, league tables and invites all have Share on WhatsApp: WhatsApp opens with the message ready and you pick the group.

Your profile, record and Excel copy

Tap your name at the top right.

Your record

Choose a period: 1M 3M 6M 1Y All

- **Profit / loss** for the period, and your return on the money you put in.
- A bar of **won** and **lost** matches, and your current run.
- **Played, win rate, best streak** · **put in, won back, biggest win**.
- **Leagues** and **one-off contests** in separate blocks, each with its own profit or loss.
- A month-by-month table.

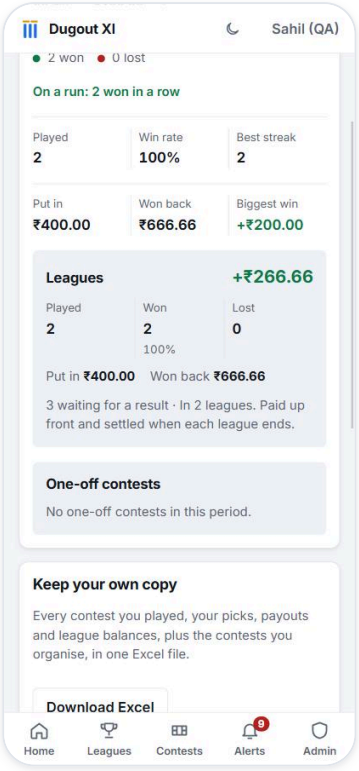

Keep your own copy

Download Excel on your profile: every contest you played, your picks, results, payouts and league balances, in one spreadsheet.

Each league has its own Download Excel too (top of the league page): the table, every match, every pick and the settle-up. Download one now and then; it is your record whatever happens.

Your details

Name, display name, phone and **UPI id**. Add your UPI id so organizers know where to send winnings: only the organizer of a league or contest you're in can see it.

Leagues and one-offs, separately.

Alerts you'll get

In the app, under Alerts. There are no emails or phone notifications, so check before each match.

WHEN	WHAT YOU SEE
Joining	The organizer accepted or declined you · a payment reminder before the deadline · your place was released because it went unpaid.
Before a match	A reminder that it starts soon · a reminder if you haven't picked · picks are locked · the start time moved · the match was cancelled.
After a match	The result is in · a result was corrected.
End of a league	The league has ended and your balance to be handed back · your settle-up was updated.
Organizers	Someone asked to join your league or contest.

Day or Dark

The moon / sun button in the top bar switches the whole app. Every screen in this guide works the same in both.

Running a league

Anyone can. Whoever creates a league is its organizer, and plays in it too (your own buy-in counts as paid).

1. **Create it.** Leagues → **Start a league**: name, tournament, amount per match, number of matches, joining and payment dates, and **how to pay** ("UPI to name@okbank").
2. **Open it.** **Open for joining**, or it opens on its own at the "joining opens" time.
3. **Invite people** from the league page: **invite code**, **Copy invite link** or **Share on WhatsApp**.
4. **Let people in** (**Players**): **Accept**, or **Accept as paid** if you have their money; otherwise **Payment received** when it arrives. You can **Decline** or **Remove**.
5. **Add matches** (**Contests** → **Add a contest**): two teams and a start time after the payment deadline. Every confirmed player is entered.
6. **Enter each result**: match → **Result** → winner (or no result) → **Work out the payouts** shows who wins what → **Confirm this result**.
7. **End the season** with **End the league**: every balance is frozen.
8. **Settle up** (**Settle up**): hand each player back the amount **To hand back**, tap **Mark settled**, then **Close the league**.

Tips

Add matches a few days ahead so players get pick reminders. Use **Reschedule** on a match if its start moves (everyone is told). Download the league's Excel after each week.

One-off contests

1. Contests → **Create a contest**: tournament, teams, start time, entry, joining and payment deadlines, how to pay.
2. Share it from the **Invite players** box: **Share on WhatsApp**, **Copy invite link** or the contest number.
3. **Players**: **Accept** requests and tap **Payment received** as money arrives.
4. After the match: **Work out the payouts** → **Confirm this result**. Then **Money**: send each winning or refund and tap **Mark as paid**.

Questions and answers

Does the app take or hold my money?
No. All money goes directly between you and the organizer. The app only records it.

I missed the joining or payment deadline.
Ask the organizer: they can change the dates until the league starts. Once the first match has started nobody can join, because there's no fair way to price the matches already played.

Can I change my pick?
Yes, as often as you like until the match starts. Then picks lock for everyone.

The match was washed out.
The organizer enters "no result" and everyone is refunded for that match.

Why is my balance different from my profit?
Profit counts only matches; your balance also includes the buy-in you paid. Balance = buy-in + profit, and that's what you get back at the end.

Who can see my phone number and UPI id?
Only you, and the organizer of a league or contest you're in.

I didn't get an alert.
Alerts appear inside the app (the bell, with a red badge). There are no emails or phone notifications, so open the app before each match.

The page says "Could not reach the server".
The server may be waking after a quiet spell. Wait up to a minute and refresh.

Who are the admins?
They look after accounts, tournaments and teams, and reset forgotten passwords. They can step in for an organizer only with a written reason, which is kept on record.

Have fun, and pick wisely.
Questions about a league or contest? Ask its organizer. Can't sign in? Use **Forgot password?** on the sign-in page.
